Weekly Coal Production

Energy Information Administration
Washington, D C

Production for Week Ended:
March 8, 1986

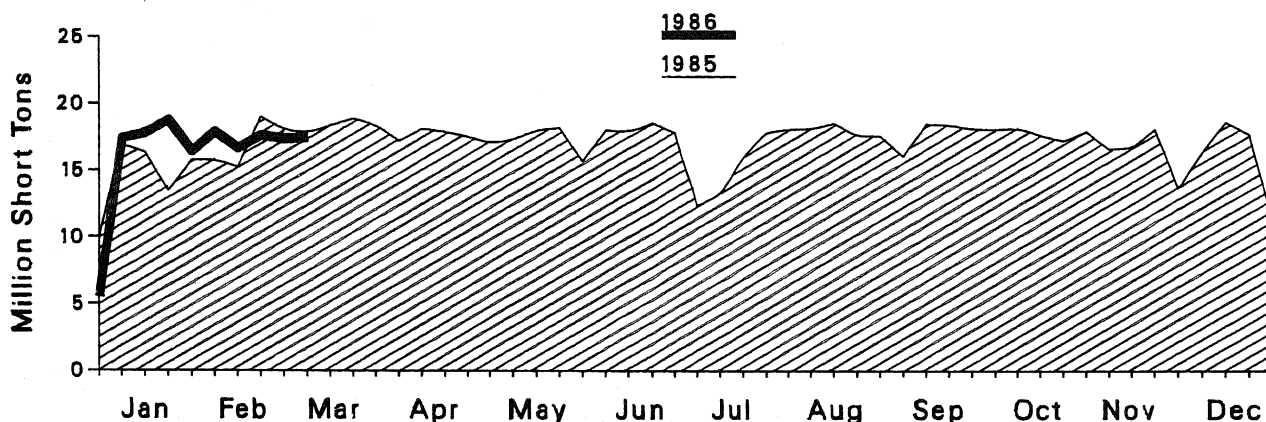

Highlights

U.S. coal production in the week ended March 8, 1986, as estimated by the Energy Information Administration, totaled 17.46 million short tons (bituminous coal and lignite, 17.38 million short tons; Pennsylvania anthracite, .07 million short tons). This was 1.0 percent higher than the previous week, and was 1.6 percent lower than production in the corresponding week of 1985.

Cumulative U.S. coal production from January 1 through March 8, 1986, was estimated at 162.66 million tons, 2.9 percent above the 158.01 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
